Section III — PHYSICAL DATA

FLASH RANGE 187 to 350°F

FLASH POINT 140°F Pensky-Martens LEL 0.9

Section IV — FIRE AND EXPLOSION HAZARD DATA

FLIGHT POINT 140°F Pensky-Martens LEL 0.9

Category Combustible Liquid

FLASH POINT 140°F Pensky-Martens LEL 0.9

Extinguishing Media Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical or foam) designed to extinguish NFPA Class II flammable liquid fires.

SPECIAL FIRE AND EXPLOSION HAZARDS Keep containers tightly closed. Isolate from heat, electrical equipment, sparks and open flame. Closed containers may explode when exposed to extreme heat. Do not apply on hot surfaces.

SPECIAL FIRE FIGHTING PROCEDURES Water spray may be ineffective. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable.
