EXTINGUISHING MEDIA
Carbon Dioxide, Dry Chemical, Foam

UNUSUAL FIRE AND EXPLOSION HAZARDS
Isolate from heat, electrical equipment, sparks, and open flame. Closed containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions, ventilation to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SPECIAL FIRE FIGHTING PROCEDURES
Full protective equipment (including self-contained breathing apparatus) should be used. Water spray may be ineffective if water is used. Fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure buildup and possible autoclirion or explosion when exposed to extreme heat.

Section V - HEALTH HAZARD DATA

ROUTES OF EXPOSURE
Exposure may be by INHALATION and/or SKIN or EYE contact, depending on conditions of use. Follow recommendations for proper use, ventilation, and personal protective equipment to minimize exposure.

ACUTE/Chronic Hazards
Effects of OVEREXPOSURE
Irritation of eyes, skin, and respiratory system. May cause severe nervous system depression. Extreme overexposure may result in unconsciousness and possibly death.

SIGNS AND SYMPTOMS OF OVEREXPOSURE
Nausea, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mist.

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MISCELLANEOUS CONDITIONS AGGRAVATED BY EXPOSURE
None generally recognized.

EMERGENCY AND FIRST-AID PROCEDURES
If INHALED: Remove from exposure. Restore breathing. Keep warm and quiet.
If on SKIN: Wash affected area thoroughly with soap and water.
If in EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention.

CHRONIC HEALTH HAZARDS
No ingredient in this product is an IARC, NTP, or OSHA listed carcinogen.

Section VI - REACTIVITY DATA

STABILITY - Stable
INCOMPATIBILITY - None known
HAZARDOUS DECOMPOSITION PRODUCTS
By Fire: Carbon Dioxide, Carbon Monoxide
HAZARDOUS POLYMERIZATION - Will Not Occur

Section VII - SPILL OR LEAK PROCEDURES

STEP 1: TAKE IN CASE MATERIAL IS RELEASED OR SPILLED

1. Remove all sources of ignition. Ventilate and remove with inert absorbent.
2. WASTE DISPOSAL METHOD
Waste from this product may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Waste must be treated for ignitability to determine the applicable EPA hazardous waste numbers.

DO not incinerate. Depressurate container. Dispose of in accordance with Federal, State, and local regulations regarding pollution.

Section VIII - PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE
Use only with adequate ventilation. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Wash hands after using.

This coating may contain materials classified as nuisance particulates (listed as Dust) in Section II. An additional or existing ventilation system may be required. If specific dusts are listed in Section II, the applicable limits for nuisance dusts are:

- MPPA TLD 10 mg/m³ (total dust)
- OSHA PEL 15 mg/m³ (total dust)
Respirator (1% respirable fraction)

VENTILATION
Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section II is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION
If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly filtered organic vapor/particulate respirator approved by MSHA/OSHA for protection against materials in Section II.

When sanding or abrading the dried film, wear a dust/mist respirator approved by MSHA/OSHA for dust which may be generated from this product. Use properly fit, or the abrasive-protective glove.

PROTECTIVE GLOVES
Use gloves which are recommended by glove supplier for protection against materials in Section II.

EYE PROTECTION
Wear safety spectacles with unpolarized sideshields.

Section IX - PRECAUTIONS

DILUTION CATEGORY - 1A
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING
Contents are EXTREMELY FLAMMABLE. Keep away from heat, sparks, and open flame. Vapors will accumulate readily and may ignite explosively. During use and until all vapors are gone, keep area ventilated. Do not smoke. Extinguish all flames, pilot lights, and heaters. Turn off stoves, electric tools and appliances. Consult NFPA Code. Use approved Bonding and Grounding procedures.

Contents under pressure. Do not puncture, incinerate, or expose to temperature above 120 °F. Heat from sunlight, radiators, stoves, hot water, and other heat sources could cause container to burst. Do not take internally. Keep out of the reach of children.

OTHER PRECAUTIONS
Incidental misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
